<https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf62/>

## Preventing Clusters: Tokyo Alert system debuts as coronavirus cases rise

- Average number of new daily cases is above 20
- If more than 50% of infection routes are unknown
- If the number of new cases in one week is greater than the number in the previous seven days.

## S.Korea reports 45 church-linked virus cases

- The government said on Tuesday that the number of cases traced to a church in the city of Incheon had reached 45.
- A cluster infection linked to the church has spread since pastors held a meeting there last week.
- New infections are on the rise again in South Korea, mainly in and around Seoul -- some 270 cases at nightclubs in Seoul.

## Indonesia to skip Hajj pilgrimage over coronavirus fears

*Largest contingent of worshippers will not be doing the annual trip to Saudi Arabia.*

14 hours ago  

Cancelling the Hajj would be unprecedented in modern times, but curbing attendance from high-risk areas

## WHO/CDC Guidance for religious gatherings

- Maintain at least 1 m (3 feet) of distance between people at all times
- Prevent touching between people attending faith services
- Prevent touching or kissing of devotional and other objects that the community is accustomed to handling communally
- Encourage healthy hygiene among participants in faith services and other activities when gatherings are permitted
- Frequently clean worship spaces, sites, and buildings
- Use technology to maintain community and continue worship

## Wuhan city-wide tests find only asymptomatic cases

- The officials said on Tuesday that they carried out the massive testing for 19 days until Monday. They said out of 9.9 million people tested, they found 300 positive cases. They were all without any symptoms.
- They launched the testing campaign after six people living in the same housing complex in the city were found to have contracted the virus.
- They said they mixed samples from a number of different people into one test to improve efficiency.
- The estimate cost of the massive testing program is more than 120 million dollars.

## **Lancet:** Physical distancing, face masks, and eye protection to prevent person-to-person transmission of SARS-CoV-2 and COVID-19: a systematic review and meta-analysis

- For the general public, evidence shows that physical distancing of more than **1 m is highly effective** and that face masks are associated with protection, even in non-health-care settings, with either disposable surgical masks or reusable 12–16-layer cotton ones.
- **Eye protection** is typically underconsidered and can be effective in community settings.
- Other basic measures (eg, **hand hygiene**) are still needed in addition to physical distancing and use of face masks and eye protection.

## **CDC: Cloth Facial Covering (facial masks)**

- We now know from recent studies that a significant portion of individuals with coronavirus lack symptoms (“asymptomatic”)
- Cloth face coverings can be made from household items.
- They are not surgical masks or N-95 respirators.
- **A cloth face covering may not protect the wearer, but will prevent the wearer from spreading the virus to others**

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/about-face-coverings.html>  
<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover.html>

## Kobe: Most hospitals taking precautionary actions

- Temperature screening at the entrance
- Limiting access to the building
- Request to bring and wear a mask
- No visitors
- Telephone refills

## Japan Sport Agency: Heat Stroke and Face Mask

- Masks should be worn when talking close to one another.
- If the mask is removed, distance 2m or more is required and should not talk.
- (teachers need to wear masks if teaching the class or talking loudly.)
- If the mask is removed and exercising in the same direction such as running, a further distance needs to be kept.
- This is not to discourage wearing masks during mild exercises.
- Do not wear a N95 mask or medical surgical mask.
- Act on appropriate heat stroke preventions
- If keeping a safe environment to prevent infection and exercising is difficult, consider refraining from physical activities at schools.

## Prevention against Heat Stroke

- Wear Appropriate Clothing
- Stay Cool Indoors or under shade
- Schedule Outdoor Activities Carefully
- Pace Yourself
- Wear Sunscreen
- Do Not Leave Children in Cars
- Avoid Hot and Heavy Meals
- Frequent hydrated
- Drink Plenty of Fluids
- Stay away from very sugary or alcoholic drinks
- Replace Salt and Minerals
- Know the Signs of heat stroke
- Monitor Those at High Risk

Thank you for joining!  
See you next week!

Schedules are available from
